

ABOUT CRITICAL SYSTEMS

Critical Systems Computer Consulting, Inc. was founded in 1996.

We strive to provide quality and affordable IT services and support to businesses of all sizes. Our customers range from single PC home offices to Fortune 500 corporations. This diversified background provides our staff with a wide range of skills and experiences that few can match.

We place a high value on providing quality service and support. Serving our clients' best interest is our top priority, and is one way we differentiate ourselves from the competition.

Critical Systems has partnered with Microsoft and several leading IT companies. These partnerships certify our knowledge and experience working with their products and provide Critical Systems with additional resources that other companies may not be able to offer.

Our employees hold many industry certifications such as CNE, MCNE, MCSA, MCSE, A+ and CCNA.

IT CONSULTING AND SERVICES OFFERED BY CRITICAL SYSTEMS

flexible solutions for your business needs

PARTNERSHIPS

Microsoft
GOLD CERTIFIED

Partner

SPAM FILTERING SOLUTIONS

If you would like a service to provide SPAM filtering for your business, we can provide a cost-effective plan as well as provide a backup store-and-forward mail server in the event of Disaster Recovery. If you are looking for a hardware device that is easy to manage, we offer the Barracuda Spam & Virus Firewall appliance.

SERVER AND LAN SUPPORT

We can implement and manage your Active Directory design, file and print services, email, internet, firewall and web hosting services, all with full or part-time support based on your individual needs. We are also a Microsoft Small Business Specialist.

DESKTOP AND MOBILE SUPPORT

Whether you require a support person onsite or just need someone to call when there's a problem, we can help by providing installation, hardware and system upgrades, and troubleshooting services.

ANTI-VIRUS/ANTI-SPYWARE HELP

Viruses and spyware cost businesses billions in lost productivity and resource overload every year. We have partnered with both Microsoft and Symantec to provide network-wide virus and spyware detection and prevention.

POWER PROTECTION

Unreliable power can cause data loss and hardware malfunctions. APC builds complete Uninterruptible Power Supply (UPS) systems that can safely power down servers during extended outages and restart them once normal power conditions resume.

VOIP—VOICE OVER IP

Critical Systems can help you get a state-of-the-art PBX system (Response Point) at a small business price. Can be used with current PSTN lines and/or with internet VoIP lines. Digital internet VoIP lines from NGT are a great addition to the Response Point system. NGT also offers hosted VoIP. We are an NGT Digital Voice Authorized Partner and can help you with these solutions.

EMAIL ARCHIVING

Need to achieve regulatory compliance on email archiving? Critical Systems can help with a Message Archive appliance from Barracuda Networks.

NETWORK INFRASTRUCTURE

Our Cisco and D-Link partnerships allow us to provide a complete networking solution. Whether installing your first wireless network, or upgrading your existing infrastructure, we can help.

MIGRATIONS

Critical Systems has been doing migration work for over a decade. We can help out with acquisitions, mergers, and divestitures. If it's a move from Novell to AD, Lotus Notes to Exchange, or GroupWise to Exchange we can help. Looking for a "green migration"? We have done much of our migration consulting remotely.

WEB FILTERING

Need to increase worker productivity by limiting internet activity? A Barracuda Web Filter appliance can help. It can provide content filtering, offer different policies for different sets of users, and restrict personal web browsing to non-working hours.

AUTOMATION

We can help you get more out of your network systems by evaluating and automating repetitive computer tasks. Do you have IT processes that are mundane and tedious? We can help you to use scripting and batch processing to achieve your results much faster.

WE'VE BEEN HELPING BUSINESSES FOR FOURTEEN YEARS. HOW CAN WE HELP YOU?

Call Critical Systems today for a discussion on your current IT needs and how we can help you... (440) 944-5659 x101
